FIGURE 3.

THREE POINT HITCH ASSEMBLY

The three point hitch is needed for the rotary tiller, disc, cultivator and moldboard plow. To use the mowing deck, snow thrower or snow blade, it is not necessary to install the three point hitch.

1. Raise the lift shaft assembly until the hole lines up with the slot in the push bar assembly. See figure 2.
2. Secure with clevis pin and hairpin cotter provided in the hardware pack.
3. Assemble the two draft bars to the link clevis pins in the frame of the tractor with two hairpin cotters.

NOTE: Refer to figure 1 to determine right and left hand draft bars.

4. Thread the ferrule onto the clevis screw until approximately a half inch of thread is showing above the ferrule.
5. Attach the ferrules to the rear lift shaft assembly and secure with two hairpin cotters.
6. Attach the lower end of the clevis screw to the draft bars with the two clevis pins and hairpin cotters.
7. Screw the two halves of the center turnbuckle together. Attach either end to any hole in the hitch bracket mounted in the center of the rear frame of the tractor with a clevis pin and hairpin cotter. See figure 3.

FIGURE 4.

Model 951

8. Screw one hex nut all the way on to each of the hook bolts.
9. Insert the hook bolt through the inside of the draft bars. Secure with a second nut. Do not tighten.
10. Fasten the chains to the hooks welded on the draft bars. Cross the chains over and attach to the opposite hook bolts. See figure 4.
11. Tighten the outside nuts on the hook bolts until there is approximately one inch of play in the center of the chains.

NOTE: Pull the chains to make them as tight as possible.

PARTS LIST FOR MODEL 951 THREE POINT HITCH

REF. NO.	PART NO.	CODE	DESCRIPTION	REF. NO.	PART NO.	CODE	DESCRIPTION
1	712-0290		Hex Cent. L-Nut 7/16-14 Thd.	14	736-0217		L-Wash. 3/8" I.D.—H.D.*
